List of 10 projects I intend to showcase:

1. All documents I've written during this program. These are documents for the weekly assignments.
2. From DSC500 Final project: A poster proposing data science solutions to customer churning problems facing business who rely on them.
3. From DSC510 Final project: A weather reporting application with a GUI. Users enter the city name or zip code, and get the temperature, weather condition, and other info. Application written in python.
4. From DSC520 Final Project: EDA on RealEstate data. Application written in R.
5. From DSC530 Final Project: Data analysis and visualization on world soccer player's statistics. Application written in python.
6. From DSC540 Final Project: Data preparation, data wrangling real estate data.
7. From DSC630 Final Project: Direct marketing using Predictive analytics.
8. From DSC680 Project1: Stock Market Analysis and prediction
9. From DSC680 Project2: Image recognition Algorithms
10. From DSC680 Project3: Real-time data streaming with kafka.
